

# INTERNET PROGRAMMING

## Fall 2019 Period 2

Lab #x: *here lab title*

Assigned on: *Example: November 11, 2019*

Due by: *Example: November 11, 2019*

October 27, 2019

*Note: Please submit this report together with your code for the lab assignment. Please first fill in all the information in the title. Also, remember to remove all the hints (red-colored text) before you submit your report.*

### **1 Team members and workload distribution**

*Here you should give the information about your group members (names, student IDs). Also, it is very important that you state in detail the contribution from each of the team members.*

### **2 Your approach**

*Here you describe in detail your approach to the problem. Please at least include the following information: (1) the general idea, (2) the rationale behind your idea, (3) steps to take.*

### **3 Comments on your code**

*Here you explain how to read your code, i.e., how your code is linked to your idea.*

### **4 Tests**

*Here you describe how you run your code and what tests you have done to show that your code works as expected.*

## 5 Proof

*Here you should include some evidence (like screenshots) to demonstrate that your idea works as expected. If your idea does not work in the expected way, please provide some explanation.*
